-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Detailed Action

This is the first Office Action corresponding to original filing. The application contains 20 claims.

Election/Restrictions

Claims 14-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made by Albin Gess on July 21, 2004.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference character(s) mentioned in the description: "39b".

The drawings are also objected to because Fig. 11 should be bracketed as per Rule 1.84(h)(1).

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the

Art Unit: 3632

remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: on page 5, paragraph 24, line 1, "2a" apparently should be - - 2b - -, and in paragraph 25, line 3, "clips 26" apparently should be - - clips 25 - -.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3632

Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thomas (Pat No 4,292,749) in view of Hawkins (2003/0000044 A1) and Doud (Pat No 6,278,061).

The patent to Thomas shows pennant for attaching a pennant (12) to a small pole (21), comprising a pole holder (14) and a clip (11).

Hawkins shows a pennant attachment comprising two halves.

Doud shows the use of a flaps for adjusting to cylinders of different diameters.

It would have been obvious to one skilled in the art at the time the invention was made to have provided Thomas' device with a pennant attachment as shown by Hawkins to receive different types of banners, and further with a flaps as shown by Doud to be used with pole of different diameters. As to claim 5, the use of more than one pole holder is seen as an obvious duplication of parts. As to claims 8-12, the pennant is not a positive element of the combination, and further the device shown by the combination set forth above is capable of securing these types of pennants. As to claim 13, the pole is not a positive element of the combination, and further the device shown by the combination set forth above is capable of being used with an automobile antenna.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hilty et al. (4,673,153), Pan (5,288,047), Lovejoy (5,957,155),

Paris (US 2003/0192467 A1) and Cardarelli (US 2004/0031433 A1) show holder of similar structures as the instant invention.
